

SPEED-E

SPEED-e is a common Internet Infrastructure that enables the Depository Participants (Participants) to provide depository services to their clients. Demat account holders (including Clearing Members) subscribing to this facility can submit delivery instructions to their DP's through *SPEED-e* website <https://eservices.nsd.com/>, instead of submitting delivery instruction slips (in paper form) to their DP's. The users of *SPEED-e* can also check latest balances and transactions in their demat accounts through a facility called Internet-based Demat Account Statement (IDeAS) and monitor the status of execution of instructions.
